SEPTEMBER 30 - OCTOBER 1, 2020

With RFID to Transparency

Sebastian Kohl

M.Sc. in Process Engineering

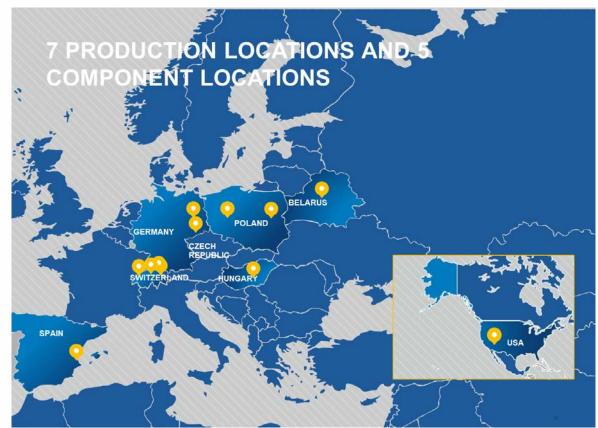

Winterthur- Competence Centre of bogies

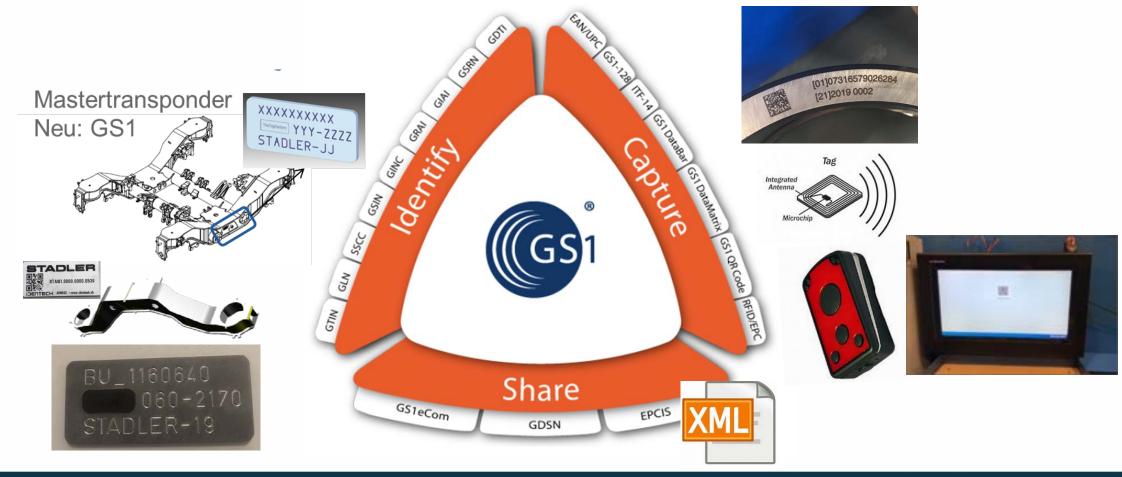

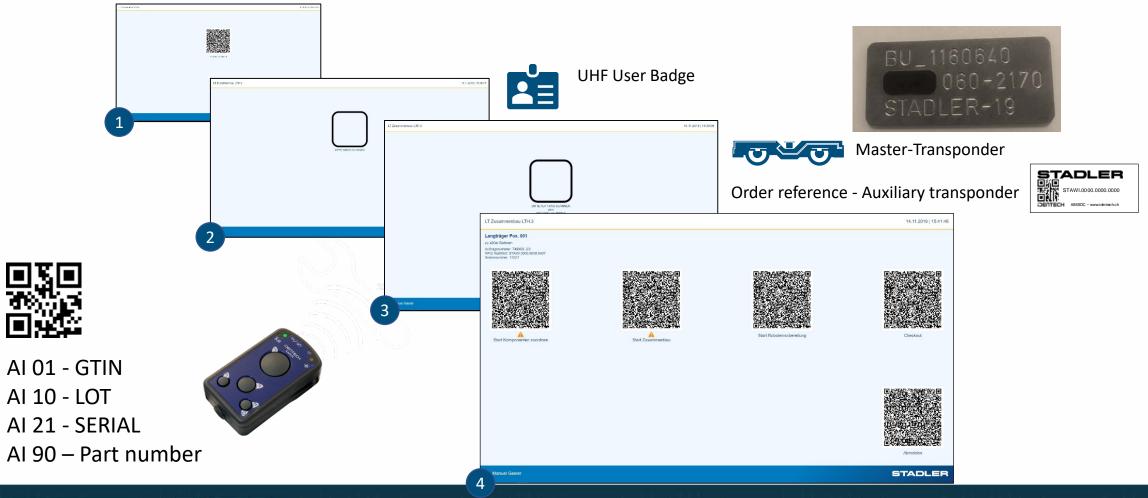

Traceability in Railway - GS1 as standard

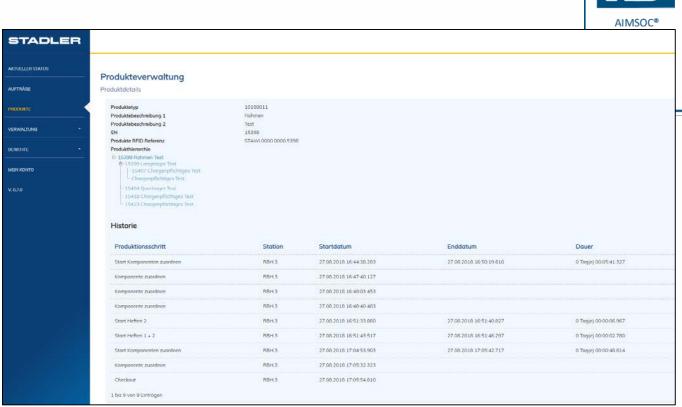

Example of a screen – Procedure for the worker

Data in the SQL-Database- Backend

RFID as Key for the machines

Benefits

- 1. Traceability live as Database Future: EPCIS
- 2. Increasing of data quality due to scans instead of making notes
- Eliminating of 10 manual process steps (no paper, no manuals, no notes, no component list, no stamping, no checking)
- 4. Less failures and costs due to digital instructions
- 5. Controlling the machines Starting the program and setting up parameters
- 6. Direct input for ERP-based planning: Relieve the ressources of the ERP live
- 7. Data collection for Business Intelligence (Lead time, Process-time, OEE)

THANKYOU
