

RF#DJOURNAL DIGITAL SUMMIT

AIM Panel: Blockchain Technology in Supply Chain Traceability Systems

Moderator: Julie McGill, VP Supply Chain Strategy & Insights, FoodLogiQ

Panelists: Raghu Bala, CEO, NetObjex & Tony Fonk, CEO, SpotSee

About AIM

- AIM is an industry alliance that represents any organization that uses, implements, resells, or develops technology around bar coding, RFID, and/or mobility technology.
- AIM is essential to enabling adoption, growth and interoperability related to Automated Data Capture technologies and the enterprises that use this technology in the marketplace.
- AIM is an unbiased, global alliance representing more than 300 organization worldwide.

Meet the Speakers

Raghu Bala CEO

Tony Fonk CEO

Julie McGill, VP Supply Chain Strategy & Insights, FoodLogiQ

- Julie McGill is the Vice President of Supply Chain and Insights at FoodLogiQ, a leading SaaS provider of food safety compliance, traceability, and supply chain transparency solutions.
- In her role, Julie works with leadership to advise on industry, regulatory, customer, and product insights to improve market adoption and penetration, customer satisfaction and value generation.
- She supports FoodLogiQ teams and customers on evolving industry activity including regulatory, standards, traceability and food safety.

Tony Fonk, President and CEO of SpotSee

- Tony brings 22 years of international business experience in developing and executing innovative product, service, and channel strategies
- He previously worked for Johns Manville, Stock Building Supply, and Ingersoll Rand
- Tony has attended executive education programs at Harvard Business School and holds a BS degree in advertising from the University of Kansas
- He is a certified Lean Six Sigma BlackBelt
- Tony is currently serving a 2-year term seat on the AIM Board of Directors

Global Shipping Damage

- \$115 trillion of goods are shipped annually.
- Global cost of shipping damage is approximately \$2.3 trillion.
- Physical damage is responsible for 43% of shipping insurance claims.
- Products are typically handled 10x during shipment.

Meeting The Challenge: SpotSee

1974

Glass tube
helps
customers
detect & deter
shipping
damage.

1995

ShockLog - first precision shock recording instrument.

2015-2016

Connectivity with ShockLog Satellite.

Purchases

MVNE.

2017-2018

SpotSee rebranding.

Expands connected

portfolio.

2019

First RFID connectivity.

2020

SpotSee Acquires
Hallcrest
Companies. Parent
of Thermax Brand
temperature

TMCHallcrest

indicators.

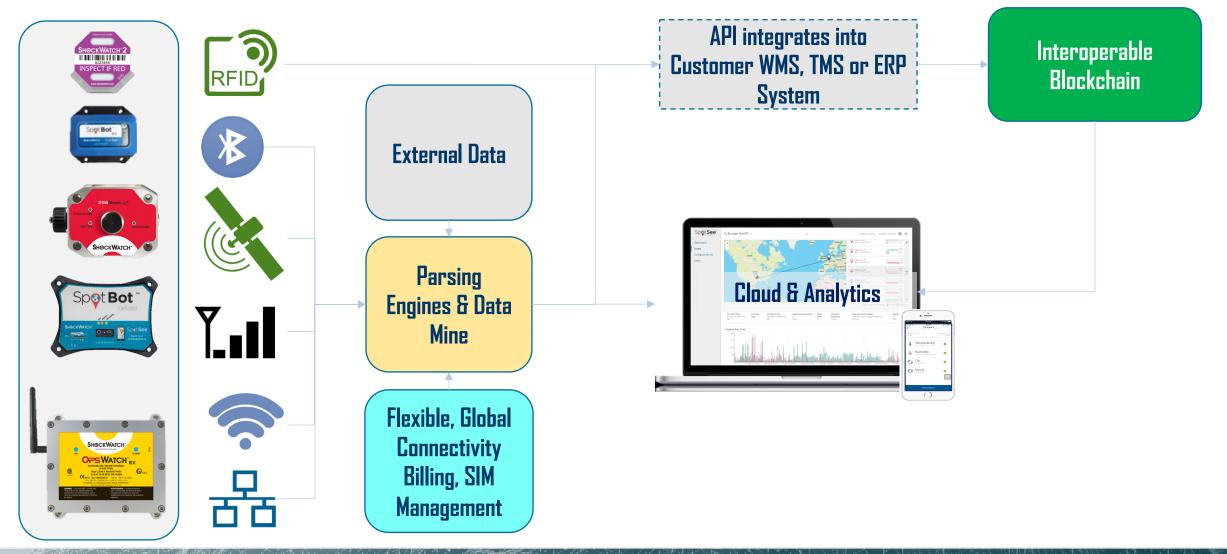

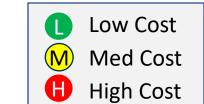

Monitoring solutions for everything from Vaccines to Spaceships

Vaccine Example: Cost / benefit of getting to a "block" of data.

Truck

- Cellular (hardware + usage)
- BLE (Requires Re-usable Infrastructure)
- Other Module + Battery

Shipper

- Passive RFID (Batteryless) Sensor
- M Active RFID with Battery
- BLE (Requires Re-usable Infrastructure)

Box

- Passive RFID (Batteryless) Sensor
- Barcode (labor intensive)
- M Active RFID with Battery

<u>Vial</u>

- Passive RFID
 (Batteryless) Sensor
- Barcode (labor intensive)
