C&A Enhances Inventory Visibility to Boost Omnichannel Capability

Vicente Neves

Supply Chain Senior Manager

Michael Bergel

Supply Chain Division Manager

The Challenge

- Accelerate and sustain ecom sales growth
- Reach global benchmark levels in inventory accuracy
- Enable real time assortment availability in our OMNI channels
- Improve in-store productivity
- **Implement it in record time mid-lockdown**

Why RFID?

- Key lever to C&A's OMNI growth strategy roadmap
- Enabler for additional use cases (loss prevention, inventory accuracy in DCs, better understanding of consumer behavior etc.)
- Widely used in the industry vs new technologies with unknown downsides
- Best for fashion vs alternatives (i.g. camera recognition etc.)

MVP

- 10 stores
- 4 months of implementation
- Tagging of products in store, after business hours with limited staffing
- Lack of hardware (national level)

RFID

SEPTEMBER 26 - 28, 2021

MVP results

- 65+% sales growth vs non-RFID stores
- 5+p.p. increase in OMNI presence vs non-RFID stores
- 50% faster in-store processes vs non-RFID stores
- 1,000 orders in one day, one store **for the first time in the company's history**
- 50+% increase in inventory visibility on digital channels vs non-RFID stores

2021 Target

- 200 full RFID stores
- 80MM tags
- 130+ suppliers
- **10 months**

Choosing the right partner

- Benchmark with vendor's clients and respective level of satisfaction
- Experience with complex RFID implementations
- One stop shop for all RFID needs
- Reputation

Technology setup

- RFID backstage: WMS and allocation software developed in-house, 10~20 years old
- RFID dedicated hardware/software: Active reading – Zebra mobile readers, Fixed portal antennas, Sensormatic's TRUEVUE

Conditions in deployment sites

- DC (tagging of imported apparel): no space to install hardware due to buffer from closed stores; poor wi-fi reception
- Stores: reduced staff in stores; poor wi-fi reception; RFID signal interference from back room; traveling unadvised and reduced operation hours due to COVID
- Suppliers: anticipated production

Rollout Results

- Inventory inaccuracy: from **20+% to <3%**
- Order cancelling due to stockout: from **10+% to <3%**
- Omni channel sales growth: **80%~100% vs non RFID stores**
- Omnisaless operations: **2x faster in RFID stores**
- ROI: **Breakeven expected in year 2022 (year 2)**

Next steps

- Full implementation, 100% stores by Q2/2022
- Loss prevention
- Self checkout
- RFID readers in fitting rooms
