RAIN Xplorer Reader Checker

Josef Preishuber-Pflügl
May 2022

WIRELESS TESTING PRODUCT PORTFOLIO

RAIN RFID XPLORER

RAIN RFID test instrument to measure the performance of RFID devices and application setups. and chips.

READER CHECKER

Battery supp. RAIN RFID device for quick reader **transmit** power/receiver **sensitivity** check in the field.

RAIN XPLORER SPY

Comprehensive RAIN air interface spy for effortless reader-tag-communication analysis.

RAIN XPLORER INLINE

High speed performance testing and encoding of RAIN RFID inlays and tags during production process.

RAIN XPLORER REEL2REEL

Automatic testing of both RAIN RFID and/or NFC tags on reels at high speed. Compact hardware and industrial grade machine.

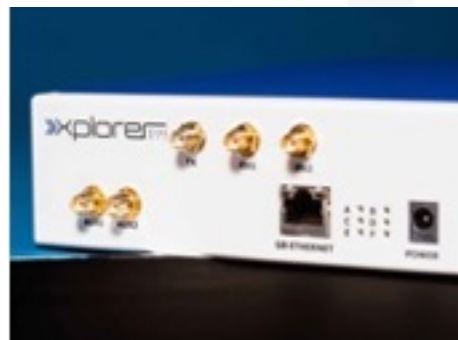

NFC XPLORER INLINE

High speed performance testing and encoding of NFC inlays and tags during production process. Integration into any production machine.

WIRELESS DEDICATED PORTFOLIO

NFC XPLORER

NFC test instrument to measure the performance of NFC tags. Reader testing through sniffer functionality.

NFC INTEROP TEST

Evaluate interoperability between NFC and/or EMVCo capable devices and corresponding readers (like POS terminals), mobiles and smart cards

NFC WLC TECHNOLOGY ELEMENTS

Boost design of NFC based WLC solutions with power and data transfer over the same interface Antenna, hardware, and firmware IP blocks for design integration

VERIFICATION

- Conformance
- Performance
- Interoperability

CONCEPT

- Standardisation
- Interface Development
- Emerging RF Technologies

DESIGN

- NFC/WLC
- RAIN
- BLE
- UWB
- RF Simulation

CONFIGURATION

- Firmware
- Software
- Apps

IMPLEMENTATION

- Prototypes
- OEM Modules

RACE TIMING

RACE  RESULT

PRODUCTION

WAREHOUSE

LOGISTICS

RACE RESULT story

CHALLENGE

- Timing systems for rent, shipped from 7 global locations
- Test procedure upon rental return
- Become independent from HQ located test lab
- Making frequent reader testing possible in daily workflow
- Less shipping of suspicious decoders from distis to HQ

SOLUTION

- Readers checked within seconds on rental return
- Closer investigation, if test fails
- Reader Checker for each distributor & large customers

ACHIVEMENTS

- Time saving, less shipping costs, less Decoder downtime
- More reliability for customers & RACE RESULT
- Find a problem, before it gets critical

RAIN Reader Checker

Discover RFID reader performance issues in seconds

KEY BENEFITS

- Immediate on-site performance check of any reader
- Portable battery device with pass/fail result indicator
- Selection of pass criteria for typical RFID applications
- Easy to use. No deep RFID expertise required
- Laptop UI for additional config, tests and analyzes

TESTING RAIN AIR INTERFACE PARAMETERS

- Check of transmit power
- Check of receiver sensitivity
- Check of used transmit frequencies and channels
- Reporting on protocol parameters
- Radio regulation regions specific checks

WIRELESS TESTING USP_s

- **#1 in NFC / RAIN RFID** measurement solutions and test equipment
 - Only company offering advanced reader performance testing
 - Only company offering GS1 Gen2 / ISO/IEC 18000-63 conformance test tool
 - Solutions for tags, readers and applications
- Measurement solutions in accordance with **international standards**
- Shaping **RFID standardization**
- Consulting services and an own **NFC and RAIN RFID test lab**
Global leader in **NFC interoperability** testing
